#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This action is responsive to communications: RCE, filed on 09/20/04.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.3333

3. Claims 1-3, 5-7, and 9-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Presnell et al., US# 6,182,067 B1 in view of Dornbush et al., US# 6,471,521 B1, and further in view of DeFrancesco et al., US# 6,587,841 B1.

As per claims 1, 9, and 11, Presnell et al. teaches "receiving information input a database; organizing items . . . database" (see col. 4, lines 10-44) "using data . . . allowing users to access and sort items of information according to selected rating criteria . . ." (see col. 8, lines 31-47). Presnell does not explicitly teach "collecting ratings and comments associated . . .". Dornbush et al. "collecting ratings and comments associated . . ." (see fig. 4—sheet 8 of 22 and col. 10, lines 55-67). It would have been obvious at the time of the invention for one of ordinary skill in the art to have combined the teachings of Dornbush and Presnell above, because using the steps of "collecting ratings and comments associated . . ." would have given those skilled in the art the tools to measure the relevancy of data received from a data via ratings and comments regarding the data. This gives users the advantage of receiving information

Art Unit: 2163

relevant data based on input by users who are familiar with that data. Presnell et al. does not explicitly teach “allowing users to locate and access selected items of information in a graphic display format . . . a side-by-side display . . . choices of what to believe . . .”. DeFrancesco et al. teaches “allowing users to locate and access selected items of information in a graphic display format . . . a side-by-side display . . . choices of what to believe . . .” (see paragraphs [[0121] and [0125]-[0126]]). It would have been obvious at the time of the invention for one of ordinary skill in the art to have combined the teachings of Presnell and DeFrancesco et al., because using the steps of “allowing users to locate and access selected items of information in a graphic display format . . . a side-by-side display . . . choices of what to believe . . .”, would have given those skilled in the art the tools to display information about data in numerous layouts. This give users the advantage of receiving data of various types in a more efficient manner.

As per claim 2, Presnell et al. teaches “adding content, multi-criteria ratings and comment . . .” (see col. 9, lines 55-67 and col. 10, lines 1-17).

As per claim 3, Presnell et al. teaches “displaying rating scores for each item . . .” (see col. 16, lines 43-67).

As per claim 5, Presnell et al. teaches “constraining the input according to subject and topic classification choices made by user prior to contributing content” (see col. 18, lines 4-39).

As per claims 6-7, Presnell et al. teaches “graphic symbols for representing the aggregate rating scores for each criteria . . .” (see col. 16, lines 40-65).

Art Unit: 2163

As per claim 10, Presnell et al. teaches "the graphic display format provides a display of other comments providing additional information . . ." (see col. 3, lines 14-56).

As per claim 12, Presnell et al. teaches "displaying the level of support for an item of information . . ." (see abstract).

As per claims 13-14, Presnell et al. teaches "selected rating criteria . . . weighted combinations . . ." (see col. 4, lines 16-67).

As per claims 15-17, Presnell et al. teaches "selected personal preferences indicating the importance of each rating criteria . . ." (see col. 16, lines 46-67).

As per claim 18, Presnell et al. teaches "allowing users to search on a given subject . . ." (see col. 15, lines 20-55).

As per claims 19-21, Presnell et al. teaches "allowing users to add new subject . . . knowledge base" (see col. 18, lines 2-17).

As per claim 22, Presnell et al. teaches "allowing content . . . comment feedback" (see col. 3, lines 39-63).
